INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents and Trademarks  
Washington, D.C. 20231

Sir:

In accordance with the provisions of 37 C.F.R. 1.56 and 37 C.F.R. 1.97-1.99, it is requested that the references listed on the attached Form PTO-1449 be made of record in the above-identified application. A copy of each of the cited references and a copy of the European Search Report in which they were cited are also enclosed.

DE 299 17 164 discloses a tool for the injection molding of toothbrush bodies consisting of at least two different, consecutively injection molded plastic components, comprising a pair of mold parts that can be moved relative to each other and that together form groups of parallel mold cavities. One of the mold parts for each group of mold cavities has a recess into which a mold insert can be fitted and partial cavities are formed in the mold inserts, each corresponding to a head area of a toothbrush body. Two of four groups of mold cavities form a first group pair in which the first plastic component is injection molded and two more of the four groups of the mold cavities form a second group pair in which the second plastic component is injection molded. The mold cavities in each group pair are parallel to each other and to those of the other group pair. One group of each group pair of mold cavities is offset perpendicular to a lengthwise direction of the mold cavities with respect to the other group. The mold cavities of a group of each group pair have head ends that are oriented so as to face each other.

In accordance with 37 C.F.R. § 1.97(e), it is certified that either (1) each item of information contained in the information disclosure statement was first cited in any
